Achievements

Communication awards. Offering the first FAA approved night vision goggle course in the world. These are only a few of our accomplishments in a long history of supporting the world's pilots.

Named in honor of our most notable pilot, the Floyd Carlson Airfield opened on July 9, 2018. For over 40 years, Floyd Carlson flew every first flight of a Bell aircraft. A true pioneer, Carlson's legacy represents the passion and dedication of our people. The airfield offers a raised landing platform and runways for training critical emergency landing maneuvers – a world-recognized differentiator of Bell's customer training experience.
