

CLARIFICATION NOTE No. 01
INTERNATIONAL ELECTRONIC COMPETITION No. 20260002/CCC/SETUR

TENDER FOR THE LOWEST PRICE FOR THE EXECUTION OF SERVICES FOR THE IMPLEMENTATION OF A WATER SUPPLY SYSTEM IN LOCATIONS WITHIN THE MUNICIPALITY OF BEBERIBE, INCLUDING THE SUPPLY OF MATERIALS AND EQUIPMENT.

The Tourism Secretariat of Ceará – SETUR/CE The Central Bidding Commission (CCC) hereby presents its response to the request for clarification submitted by a bidder, the content of which is transcribed below:

QUESTION 1- In item 01.02.01.01 – MONTHLY MAINTENANCE OF FLOWER BEDS UP TO 7,000 m², the quantity reported in the spreadsheet is 76,155.84 m². Please verify if this quantity is correct, considering that the item description establishes monthly maintenance limited to areas up to 7,000 m². Therefore, we request clarification regarding the criteria used to determine this quantity.

ANSWER 1– It is clarified that the expression “up to 7,000 m²” in the item description does not refer to the total quantity contracted, but rather to the parameter used in the composition of unit costs in the adopted reference table, which considers this area range as the basis for defining productivity and standard team size.

The quantity reported in the budget spreadsheet, corresponding to 76,155.84 m², represents the total sum of the construction site areas planned for maintenance throughout the contract period, duly determined based on the projects and technical surveys.

It should be noted that the unit of measurement for this item is square meters (m²), and payment will be made according to the area actually completed, in accordance with monthly measurements.

Therefore, it is confirmed that the quantity presented is correct and consistent with the scope of the project.

QUESTION 2 -For a better understanding of the quantities shown in the spreadsheet, we request that you provide the budget calculation details.

ANSWER 2- In accordance with the rules established in the Call for Bids (Notice), where, with the aim of avoiding motivated discretion (Art. 24, Law 14.133/2021), increasing the prevention of collusion and "spreadsheet manipulation," and complying with the principles of efficiency and economy, publicity, and transparency, the budget is confidential, a measure that will also benefit competitiveness. In this sense, the calculation details, by revealing the cost structure and financial logic of the agency, fall under this strategic protection and therefore will not be disclosed.

QUESTION 3 -In the provided basic project, file: 309_SAA_BEBERIBE_24_ETA_CPS_R1-CORTE AAE CORTE BB, the item "Parshall Flume in Fiberglass 6" is listed; however, in the budget spreadsheet, item 10.05 – UNIT_PARSHALL FLUME – SUPPLY OF MATERIALS, we do not identify the supply of said Parshall flume. Therefore, we understand that if the supply and installation of the Parshall Flume are necessary, these services should be addressed later through a contractual addendum. Is our understanding correct? If not, please clarify.

ANSWER 3Yes, the understanding is correct, noting that the supply of Parshall flumes may be subject to an addendum to the contract, if their acquisition becomes necessary.

QUESTION 4- Upon analyzing the projects, we identified that some items described in the bill of materials have specifications different from those in the budget spreadsheet. For example, item 12.03.02.02 of the file "SAA BEBERIBE R02 – DELIVERY WITHOUT PRICE" contains the following description: SUBMERSIBLE MOTOR-PUMP SET – POWER = 7.5 HP, as shown in Image 01 below.

DIN 100A					
12.03			ETA - EEAT MORRO BRANCO_INTERLIGAÇÕES - FORNECIMENTO DE MATERIAIS		
12.03.02			FORNECIMENTO DE CONEXÕES		
12.03.02.01			MEDIDOR DE VAZÃO ULTRASSÔNICO PARA CANAIS ABERTOS	UN	1,00
12.03.02.02			CONJ. MOTO-BOMBA SUBMERSÍVEL - POT= 7,5CV	UN	2,00
12.03.02.03			ARRUELA BORRACHA P/ FLANGES DN 150 PN10 P/ AGUA	UN	26,00

However, upon analyzing the project provided in the file “309_SAA_BEBERIBE_30_ETA_EEAT_R1”, we verified that the list of materials includes two submersible pumps with a different power rating than that specified in item 12.03.02.02 of the file “SAA BEBERIBE R02 – DELIVERY WITHOUT PRICE”.

TABELA DE EQUIPAMENTO MECÂNICO		
ITEM	DESCRIÇÃO	QUANT.
23	BOMBA CENTRIFUGA, Q=16.89L/s, ATM=63.40m, P=20.10kw	2
45	BOMBA CENTRIFUGA, Q=60.00L/s, ATM=17.00m, P=12.36kw	2
63	BOMBA CENTRIFUGA, Q=30.09L/s, ATM=54.10m, P=20.90kw	2
78	MONOVIA PERFIL "I" COM TROLE E TALHA ELÉTRICA CAP. 0.5 TONELADA L=5,48m E ALTURA DE SUSPENSÃO 4,60m	1
79	MOTOBOMBA SUBMERSÍVEL: POT=0,5CV, CAP.RECALQUE=3,5L/S, HM=4,0mca	2
100	MEDIDOR DE VAZÃO ULTRASSÔNICO PARA CANAIS ABERTOS (SENSOR IP68)	2

As in the example above, we have identified other items that also show discrepancies between the documents. Therefore, we request clarification on what we should consider in the budget: the list of materials/equipment from the projects or the list of materials/equipment from the budget spreadsheet.

ANSWER 4 Bidders must refer to the quantities and descriptions contained in ANNEX D - QUANTITY SPREADSHEET, when formulating their price proposals.

QUESTION 5- In the item: Execution of a Water Treatment Plant with a flow rate equal to or greater than 25 l/s; what is meant by unit: N/A?

ANSWER 5– The term “N/A” means “Not Applicable”, since, given that only one water treatment plant is planned, the minimum requirement is the construction of one piece of equipment. Therefore, it is unreasonable to follow the maximum required percentage, which is 50%, corresponding to half of a plant.
