

CLARIFICATION NOTE No. 03

INTERNATIONAL ELECTRONIC COMPETITION No. 20260003/CCC/SETUR

TENDER FOR THE LOWEST PRICE FOR THE EXECUTION OF ENVIRONMENTAL REQUALIFICATION, DRAINAGE AND URBANIZATION WORKS OF LAGOONS IN THE MUNICIPALITY OF PARACURU-CE, UNDER AN INTEGRATED EXECUTION REGIME.

The Tourism Secretariat of Ceará – SETUR/CE through The Central Bidding Commission (CCC) hereby presents its response to the request for clarification submitted by a bidder, the content of which is transcribed below:

QUESTION 01 - I am writing to request the analytical breakdowns of the unit prices and the Physical-Financial Schedule for the project related to the tender mentioned below.

International Electronic Tender No. 20260003/SETUR/CCC

NUP Process Number: 36001.000866/2026-03 | UASG: 943001 | Comprasnet Number: 95071/2026

Subject: EXECUTION OF ENVIRONMENTAL REQUALIFICATION, DRAINAGE AND URBANIZATION WORKS FOR LAGOONS IN THE MUNICIPALITY OF PARACURU-CE

Estimated value: R\$ 30,655,418.71 (thirty million, six hundred and fifty-five thousand, four hundred and eighteen reais and seventy-one cents)

ANSWER 01 - The contracting method for the object of the bidding process is integrated contracting, meaning that a detailed budget with spreadsheets and analytical price breakdowns is not required. The bidding document only includes the preliminary design and an estimate of the total contract value, therefore making it impossible to fulfill the request.

QUESTION 02 - I request the correct compositions for the items below.

ITEM	CODE	DESCRIPTION	UND	AMOUNT
2.1.1	CPUE01	ADMINISTRATION	%	100.00

6.1.10	CPU 19	Eucalyptus wood pergola	UND	1.00
6.1.11	CPUE 08	URBAN KIOSK	UND	8.00
6.1.12	CPUE 09	POWER SUPPLY / LIGHTING	UND	1.00
7.1.1	CPU_10	PREPARATION OF BASIC ENGINEERING PROJECTS	UND	1.00
7.2.1	CPU_11	PREPARATION OF ENGINEERING DETAILED DESIGN PROJECTS	UND	1.00

ANSWER 02 - The contracting method for the object of the bidding process is integrated contracting, meaning that a detailed budget in spreadsheets and analytical price breakdowns is not required. The bidding document only includes the preliminary design and an estimate of the total contract value, therefore making it impossible to fulfill the request made.

QUESTION 03 - ANNEX E – DRAFT CONTRACT, CLAUSE FIVE – CONTRACT EXECUTION: The indirect execution regime will be carried out through a unit price contract. We want to know if the payment will be for the actual amount worked, whether more or less. Is our understanding correct? If not, please clarify.

ANSWER 03 - No. The understanding is incorrect.

Considering that the contracting will be carried out under the integrated contracting regime, in accordance with Law No. 14.133/2021, in which the contractor is responsible for preparing the basic and executive projects and for executing the work.

In integrated contracting, remuneration will comply with the conditions established in the contract and the measurement criteria stipulated in the call for tenders, as per the attached event chart of the bidding document.

We emphasize that the bidder assumes responsibility for developing the engineering solutions necessary to meet the performance parameters and requirements defined in the preliminary design, with the risks inherent to the quantities required for the execution of the project allocated according to the contractual risk matrix.

Thus, any differences in quantities resulting from the development of projects by the contractor do not, in themselves, give rise to a revision of the contractual values, except for the legally permitted cases of economic-financial rebalancing or contractual amendment provided for in Law No. 14,133/2021.

QUESTION 04 - If there are services to be performed on the project that are not included in the price schedule, will these be added to the budget? If not, please clarify.

ANSWER 04 – Not necessarily. In integrated contracting, the contractor is responsible for preparing the basic and executive designs and executing all the technical solutions essential to fulfilling the contracted object and objective, even if certain services are not itemized in the reference budget spreadsheet.

Only services resulting from modifications determined by the Administration, unforeseen supervening events, or other situations expressly provided for in Law No. 14.133/2021, will be subject to contractual amendment, observing the legal requirements for the execution of an addendum. The mere absence of a specific service in the reference spreadsheet does not, in itself, constitute a right to contractual amendment when such service is inherent to the engineering solution necessary for the perfect execution of the object.
