

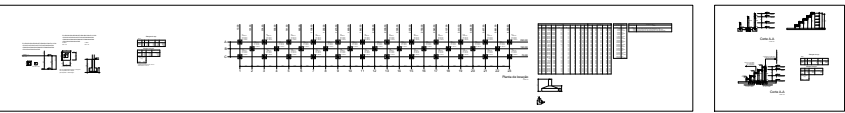

Figure 1 illustrates the experimental design. The left side shows a timeline of the experiment, divided into three main phases: Pretest, Training, and Test. The Pretest phase includes a Pretest of the procedure (10 min) and a Pretest of the procedure (10 min). The Training phase includes a Training of the procedure (10 min) and a Training of the procedure (10 min). The Test phase includes a Test of the procedure (10 min) and a Test of the procedure (10 min). The right side shows a schematic of the test phase, including a timeline of the test phase and a schematic of the test phase.
