DETALHE HID-3
1:25

A 3D perspective rendering of a water filtration system. The system consists of several blue pipes connected by black fittings and elbows. Three black pump units are visible, each with a circular top and a discharge pipe. Two large, green, cylindrical tanks are positioned on the right side of the system. The entire setup is mounted on a grey base. The rendering is detailed, showing the texture of the pipes and the metallic components.
