TABLE 1

Summary of the results of the regression analysis

The following table summarizes the results of the regression analysis. The dependent variable is the number of days off work due to sickness absence. The independent variables are categorized into three groups: Demographics, Work-related factors, and Health-related factors. The coefficients represent the estimated effect of each variable on the dependent variable.

Variable	Coefficient
Age	-0.05
Gender	0.12
Marital status	0.08
Education level	0.03
Income level	0.01
Work-related factors	
Job satisfaction	-0.15
Organizational commitment	-0.10
Perceived stress	0.20
Health-related factors	
Self-rated health	-0.30
Mental health	0.18
Physical health	0.15

CONSIGLIATE LE EMERGENZE - MODELLO A

Indicações conj. tomadas

a=T25	a = Número do conjunto de tomadas
b=C05	b = Número do circuito
c=100 III	c = Potência disponível para o conjunto de tomadas
