

Technical drawing of a vertical mechanical component, likely a valve or actuator. It features a central shaft with a threaded section in the middle, flanked by two sets of horizontal lines representing the valve body. The top part has a handle or lever mechanism. The drawing is a cross-sectional view, showing internal details like the valve seat and the internal thread.

Technical drawing of a vertical mechanical component, likely a valve or actuator. It features a central shaft with a threaded section in the middle, flanked by two sets of horizontal lines representing internal components or seals. The top has a handle or lever mechanism. The bottom is a base with a circular opening and horizontal lines.
